

ELIZABETH DURAN

Profile

13 years in Software Development, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: Next.js and React.

Education

Bachelor, Software Engineering

Fairview Institute of Technology | 2008 – 2012

Relevant Experience

Spotify — Backend Developer

Sep '17 – Present

- Designed and shipped FastAPI services handling 8k requests per minute, cutting p99 latency from 1200ms to 180ms.
- Led the migration of a legacy monolith to JavaScript, taking deployments from fortnightly to 8 per day.
- Built a reusable FastAPI component library adopted by 8 product teams, removing months of duplicated work.
- Cut CI build times by 25% by parallelising the Nginx pipeline and caching dependency layers.

Full-Stack Developer, Adobe

Jul '15 – Sep '17

- Introduced contract testing with Java, lifting coverage from 30% to 94% and cutting integration bugs.
- Drove the team's adoption of trunk-based development, reducing merge conflicts and lead time by 18%.
- Rewrote the search path in Django, dropping median response from 600ms to 110ms for 20M monthly users.

Backend Developer, Harbor Point Tech

Oct '13 – Feb '15

- Partnered with product to scope and deliver 30 major releases, each behind staged rollouts.
- Mentored 30 junior engineers, ran weekly design reviews, and authored the team's onboarding guide.

Adobe — Junior Backend Developer

Mar '12 – May '13

- Set the service-level objectives for 4 services and built the dashboards the team still runs on.
- Hardened authentication flows in JavaScript after a security review, closing 5 findings before audit.

Skills

Next.js (13 yr exp), React (13 yr exp), Java (7 yr exp), FastAPI (8 yr exp), JavaScript (2 yr exp), CI/CD (13 yr exp), C# (6 yr exp), Django (11 yr exp), Redis (7 yr exp), Grafana (12 yr exp), Airflow (8 yr exp), Nginx (10 yr exp), Git (5 yr exp), TensorFlow (11 yr exp)

Personal Projects

Home energy dashboard

Collects meter readings and renders them with FastAPI. Mostly an excuse to learn time-series storage properly.

Personal finance tracker

Self-hosted spend tracker built with TensorFlow. Deliberately kept the data local rather than using a hosted service.

Certificates

TensorFlow Developer Certificate — Google, 2022

Publications

"Measuring the cost of technical debt in delivery throughput" - co-authored conference paper, 2013.

"Measuring the cost of technical debt in delivery throughput" - accepted at a peer-reviewed workshop, 2013.
