Professional Summary

Pragmatic Full-Stack Developer (3 years in Software Development). I enjoy untangling messy systems and leaving them simpler than I found them. Day to day that means Docker, GraphQL and a lot of conversations with the people who use what we build.

Professional Experience

Full-Stack Developer

Lumen Works | 2025-05 — Present | Harmonmouth

- » Set the service-level objectives for 3 services and built the dashboards the team still runs on.
- » Hardened authentication flows in TypeScript after a security review, closing 50 findings before audit.
- » Introduced contract testing with the automation framework, lifting coverage from 4% to 90% and cutting integration bugs.
- » Designed and shipped GraphQL services handling 2k requests per minute, cutting p99 latency from 1200ms to 140ms.

Software Engineer

Salesforce | 2023-05 — 2025-05 | Port David (Remote (UK))

- » Refactored the billing module behind a feature flag, eliminating 18% of recurring production incidents.
- » Drove the team's adoption of trunk-based development, reducing merge conflicts and lead time by 70%.
- » Owned the customer-facing API end to end on GraphQL, from schema design through on-call support.

Qualifications

Bachelor, Data Science

Braxton University | 2018 — 2021

Skills

Languages: TypeScript, Ruby

Frameworks: Pandas

Cloud & DevOps: Docker

Data: Redis

Testing & Tooling: GraphQL

Side Projects

Home energy dashboard

Collects meter readings and renders them with GraphQL. Mostly an excuse to learn time-series storage properly.

Docker utility library

Open-source helper library for Docker, ~200 GitHub stars. Wrote the docs and handled issue triage.

Volunteering

Committee member, local Software Development meetup - organise speakers and venue.
