About Me

Pragmatic Junior Software Engineer (4 years in Software Development). I enjoy untangling messy systems and leaving them simpler than I found them. Day to day that means Git, Angular and a lot of conversations with the people who use what we build.

Employment History

Junior Software Engineer, Airbnb

05/2022 - Present

- Designed and shipped Angular services handling 20k requests per minute, cutting p99 latency from 900ms to 110ms.
- Replaced a third-party dependency with an in-house Python module, saving \$10k per year in licence fees.
- Introduced contract testing with Python, lifting coverage from 8% to 92% and cutting integration bugs.
- Cut CI build times by 30% by parallelising the the in-house toolchain pipeline and caching dependency layers.

Education and Training

High School

Stanleyfort High School | 2017 - 2021

Technical Skills

- Git
- Angular
- Redis
- gRPC
- Python
- Confluence
- Airflow
- Bash

Selected Projects

Commute optimiser

Pulls transit APIs and suggests departure times, built on Bash.

Volunteer Experience

Maintainer of a small open-source Redis library used by a handful of teams.

Hobbies & Interests

Competitive pub quizzes, Trail running, Volunteering at a local coding club
