About Me

Applied Scientist with 11 years in Data/AI/ML, currently at Atlassian. I work at the point where architecture meets delivery: setting technical direction, then staying close enough to the code to know whether it held. Strongest in Airflow, PyTorch and Spark.

Key Achievements

- Translated ambiguous business questions into a modelling roadmap with product and finance stakeholders.
- Established offline/online evaluation parity, catching 3 silent regressions before release.
- Migrated ad-hoc notebooks into versioned PyTorch pipelines with reproducible runs and tracked experiments.

Experience

Applied Scientist, Atlassian

May '14 – Apr '26

- Cut inference cost by 30% through quantisation, batching and autoscaling on AWS.
- Reduced label noise by redesigning the annotation guidelines, improving validation accuracy by 55%.
- Wrote the team's model documentation and review standard, now required before any production launch.
- Trained and deployed Spark models serving 50M predictions per day at under 140ms p95.
- Mentored 10 analysts moving into modelling work, with weekly paper reading and code review.

Education & Qualifications

High School

Sampsonstad High School | 2010 – 2013

Skills

Airflow — Advanced

PyTorch — Advanced

Spark — Proficient

TensorFlow — Intermediate

Python — Expert

AWS — Expert

Pandas — Proficient

Hugging Face — Advanced

Playwright — Intermediate

Sketch — Advanced

Git — Proficient

Postman — Working knowledge

Training & Certifications

Databricks Certified Data Engineer Associate — Databricks, 2016

Google Analytics Certification — Google, 2017

Language Skills

English – C2
