

Vincent Hamilton

jennifer46@example.net • 417-408-7027

Professional Summary

Senior AI Researcher with 21 years in Data/AI/ML, currently at Oracle. I work at the point where architecture meets delivery: setting technical direction, then staying close enough to the code to know whether it held. Strongest in PyTorch, Snowflake and Pandas.

Education and Training

Master, Data Science

Lakeshore University | 2003 – 2004

Bachelor, Biology

Universidad Politecnica de Madrid | 1998 – 2002

Work Experience

Senior AI Researcher, Oracle

May 2013 – Jan 2026 | South Elizabethtown

- » Trained and deployed Spark models serving 50M predictions per day at under 40ms p95.
- » Wrote the team's model documentation and review standard, now required before any production launch.
- » Mentored 30 analysts moving into modelling work, with weekly paper reading and code review.
- » Developed an NLP classification system in Pandas reaching 82% F1, replacing a manual review queue.
- » Translated ambiguous business questions into a modelling roadmap with product and finance stakeholders.

Machine Learning Engineer, Cloudflare

Sep 2007 – May 2013 | West Michelleborough (Remote (UK))

- » Built an end-to-end training pipeline on TensorFlow, cutting retraining from days to 10 hours.
- » Productionised demand forecasting models that reduced stock-outs by 25% across 15 regions.
- » Reduced label noise by redesigning the annotation guidelines, improving validation accuracy by 60%.
- » Migrated ad-hoc notebooks into versioned TensorFlow pipelines with reproducible runs and tracked experiments.

MLOps Engineer, Netflix

Jul 2006 – Sep 2007 | West Heidi

- » Established offline/online evaluation parity, catching 15 silent regressions before release.
- » Lifted recommendation click-through by 45% through feature engineering and retraining cadence in Spark.
- » Cut inference cost by 45% through quantisation, batching and autoscaling on Grafana.

Data Scientist, Clearwater Systems

Dec 2005 – Jul 2006 | East Felicia

- » Built the feature store that 30 downstream models now read from, ending duplicated feature logic.
- » Ran A/B tests across 12 model variants; the winning variant added an estimated \$120k in annual revenue.
- » Interviewed and onboarded 40 new hires, shaping the hiring bar for the team.

AI Researcher

Spotify | Dec 2004 – Dec 2005 | Jacobmouth (Hybrid - 2 days on-site)

- » Represented the team in cross-functional planning with product, design and support.
- » Ran retrospectives and drove the follow-up actions to completion, not just to the board.
- » Reduced technical debt on a legacy component that had blocked 30 previous attempts.

Projects

Personal finance tracker

Self-hosted spend tracker built with Linux. Deliberately kept the data local rather than using a hosted service.

Charity chatbot

Built a TensorFlow assistant for a local charity to answer volunteer questions; retired it once they moved to a supported platform.

Training & Certifications

Tableau Desktop Specialist — Tableau, 2016

Research Output

"Drift detection for production forecasting models" - technical report, 2006. Cited internally as the basis for the current design.

"Handling label noise in weakly supervised classification" - accepted at a peer-reviewed workshop, 2004.

Language Skills

English – C2

Hobbies & Interests

Competitive pub quizzes, Amateur photography, Cooking, Long-distance swimming
