Professional Summary

Senior Infrastructure Engineer with 29 years in DevOps/Infrastructure, currently at Nova Tech Group. I work at the point where architecture meets delivery: setting technical direction, then staying close enough to the code to know whether it held. Strongest in GCP, Go and Nginx.

Career History

Senior Infrastructure Engineer, Nova Tech Group

May 2007 to Current | Port Patrick (Hybrid)

- Built CI/CD pipelines with Jenkins, bringing mean time to deploy under 3 minutes.
- Introduced secret rotation and least-privilege IAM across 50 accounts.
- Hardened Nginx environments ahead of SOC 2, closing 20 critical findings.
- Designed the multi-region failover strategy and led the game-day exercises that proved it.

Senior DevOps Engineer

Keystone Apps | July 2003 to January 2007 | North Ninaton

- Automated 4 manual runbooks, saving an estimated 4 engineer-hours per month.
- Led the Kubernetes upgrade across 5 clusters with zero customer-visible downtime.
- Reduced incident MTTR from 6 hours to under 90 minutes with better alert routing and runbooks.

Site Reliability Engineer, Adobe

April 1998 to April 2003 | Anthonyport (Remote (UK))

- Cut container image sizes by 18%, shortening cold starts across the fleet.
- Introduced infrastructure-as-code with Datadog, eliminating manual provisioning entirely.

Cobalt Systems — DevOps Engineer

May 1996 to December 1997 | South Leroyland (On-site)

- Improved cluster utilisation by 12% through right-sizing and Nginx autoscaling policies.
- Ran the on-call rotation for 8 production services, sustaining 99.9% availability.

Academic Background

High School

North Rebecca High School | 1996

Key Skills

GCP (5 years), Go (27 years), Nginx (1 year), AWS (16 years), Prometheus (19 years), Docker (20 years), Kubernetes (1 year), Jenkins (10 years), Datadog (22 years), Grafana (11 years), Redis (22 years), Playwright (9 years), MySQL (6 years), Git (29 years), Terraform (13 years), TensorFlow (28 years)
