Test Automation Engineer with 4 years in QA/Testing, focused on TypeScript and pytest. Comfortable owning a feature from discovery through to production support.

CAREER HISTORY

Test Automation Engineer, Stonebridge IT

2022–Present

- Set up cross-browser and device coverage in CI/CD, catching defects staging had missed.
- Drove accessibility coverage from 8% to 85% of core journeys.
- Reduced escaped defects by 45% through risk-based test prioritisation.
- Automated 4 regression suites with CI/CD, cutting the manual test cycle by 15%.

EDUCATION & QUALIFICATIONS

Bachelor, Communications

Fairview Institute of Technology | 2021

Dean's List (2 years)

Relevant coursework: Digital Strategy, Media Theory, Research Methods, Public Relations

CORE COMPETENCIES

TypeScript (1 year), pytest (2 years), GitHub Actions (1 year), CI/CD (1 year), Docker (2 years), Confluence (4 years)

SIDE PROJECTS

Personal finance tracker

Self-hosted spend tracker built with TypeScript. Deliberately kept the data local rather than using a hosted service.

Home energy dashboard

Collects meter readings and renders them with Confluence. Mostly an excuse to learn time-series storage properly.

LICENCES & CERTIFICATIONS

Professional Data Engineer — Google Cloud, 2020

Databricks Certified Data Engineer Associate — Databricks, 2022

Google Analytics Certification — Google, 2019

LANGUAGE SKILLS

English – C2
