

Amy Li

johnchristian@example.com | (201)672-6280x3364 | Campbellland | linkedin.com/in/amy-li

Career Highlights

- Trained and deployed NumPy models serving 5M predictions per day at under 140ms p95.
- Wrote the team's model documentation and review standard, now required before any production launch.
- Migrated ad-hoc notebooks into versioned Pandas pipelines with reproducible runs and tracked experiments.

Career History

AI Researcher, Lumen Works

2018-02 — Present | West Karenside

- Lifted recommendation click-through by 40% through feature engineering and retraining cadence in NumPy.
- Established offline/online evaluation parity, catching 6 silent regressions before release.
- Reduced label noise by redesigning the annotation guidelines, improving validation accuracy by 70%.
- Built an end-to-end training pipeline on Databricks, cutting retraining from days to 40 hours.

Nova Tech Group — Junior Machine Learning Engineer

2013-07 — 2017-12 | Shawnfurt

- Built the feature store that 20 downstream models now read from, ending duplicated feature logic.
- Cut inference cost by 40% through quantisation, batching and autoscaling on AWS.
- Mentored 6 analysts moving into modelling work, with weekly paper reading and code review.

Education and Training

High School

Dennisstad High School | 2011

Technical Skills

Pandas (9 years), Airflow (5 years), Spark (12 years), PyTorch (11 years), LangChain (4 years), AWS (1 year), NumPy (3 years), Databricks (11 years), BigQuery (10 years), Kafka (11 years), MLflow (4 years), FastAPI (13 years), GraphQL (10 years), pytest (5 years)

Open Source

Recipe search engine

Full-text search over a scraped recipe corpus using FastAPI; learned more about ranking than about cooking.

Match-day predictor

Small model in pytest predicting league results. Beats the naive baseline; still loses to the bookmakers.

Honours & Awards

Graduated with Distinction, 2026

Employee of the Quarter, 2022
