

Sarah Pope

Applied Scientist

Professional Profile

17 years in Data/AI/ML, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: PyTorch and Python.

Career History

Applied Scientist

Cobalt Systems | Aug 2014 – Present

- Translated ambiguous business questions into a modelling roadmap with product and finance stakeholders.
- Built the feature store that 50 downstream models now read from, ending duplicated feature logic.
- Migrated ad-hoc notebooks into versioned PyTorch pipelines with reproducible runs and tracked experiments.
- Built an end-to-end training pipeline on Databricks, cutting retraining from days to 12 hours.

IBM — Junior Machine Learning Engineer

Aug 2008 – Mar 2014

- Lifted recommendation click-through by 30% through feature engineering and retraining cadence in PyTorch.
- Wrote the team's model documentation and review standard, now required before any production launch.
- Trained and deployed PyTorch models serving 4M predictions per day at under 180ms p95.

Education and Training

Bachelor, Physics

University of Cambridge | 2005 – 2008

Magna Cum Laude

Certificates

ISTQB Certified Tester - Foundation Level — ISTQB, 2021
