HEATHER LUTZ

Junior Applied Scientist

Professional Profile

Junior Applied Scientist with 1 year of commercial experience across Data/AI/ML. I learn fast, ask a lot of questions, and care about leaving code clearer than I found it. Core tools: LangChain, BigQuery.

Academic History

High School

Lewisport High School | 2021 – 2024

Employment History

Junior Applied Scientist, Ironwood Labs

Sep '25 – Present

- Developed an NLP classification system in Spark reaching 94% F1, replacing a manual review queue.
- Mentored 4 analysts moving into modelling work, with weekly paper reading and code review.
- Built the feature store that 2 downstream models now read from, ending duplicated feature logic.

Side Projects

Personal finance tracker

Self-hosted spend tracker built with Airflow. Deliberately kept the data local rather than using a hosted service.

Home energy dashboard

Collects meter readings and renders them with LangChain. Mostly an excuse to learn time-series storage properly.

Commute optimiser

Pulls transit APIs and suggests departure times, built on Spark.
