Personal Statement

Senior Data Scientist with 16 years in Data/AI/ML, currently at Cobalt Systems. I work at the point where architecture meets delivery: setting technical direction, then staying close enough to the code to know whether it held. Strongest in Docker, TensorFlow and MLflow.

Education & Qualifications

High School

West Angelashire High School | 2005 — 2008

Technical Skills

Docker, TensorFlow, MLflow, NumPy, AWS, Pandas, Databricks, BigQuery, Kafka, Next.js, Vue.js, Swift, FastAPI

Relevant Experience

Cobalt Systems — Senior Data Scientist

2019-12 — 2026-04

- Built the feature store that 8 downstream models now read from, ending duplicated feature logic.
- Trained and deployed NumPy models serving 2M predictions per day at under 80ms p95.
- Productionised demand forecasting models that reduced stock-outs by 18% across 15 regions.
- Lifted recommendation click-through by 55% through feature engineering and retraining cadence in TensorFlow.

Senior MLOps Engineer, Lumen Works

2015-03 — 2019-07

- Built an end-to-end training pipeline on NumPy, cutting retraining from days to 10 hours.
- Developed an NLP classification system in Pandas reaching 92% F1, replacing a manual review queue.
- Mentored 5 analysts moving into modelling work, with weekly paper reading and code review.

Data Scientist

Meridian Software | 2010-12 — 2015-02

- Ran A/B tests across 15 model variants; the winning variant added an estimated \$150k in annual revenue.
- Reduced label noise by redesigning the annotation guidelines, improving validation accuracy by 35%.

AI Researcher, Harbor Point Tech

2009-10 — 2010-12

- Cut inference cost by 15% through quantisation, batching and autoscaling on Docker.
- Wrote the team's model documentation and review standard, now required before any production launch.

Junior Data Scientist, Beacon Interactive

2009-02 — 2009-09

- Migrated ad-hoc notebooks into versioned TensorFlow pipelines with reproducible runs and tracked experiments.
- Translated ambiguous business questions into a modelling roadmap with product and finance stakeholders.
