## CAREER OBJECTIVE

14 years in Data Analysis, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: BigQuery and Airflow.

## CAREER HISTORY

### Senior Business Intelligence Analyst, Cobalt Systems

Oct 2020 – Jun 2026 | Port Mikeside (Remote)

- Automated monthly reporting with Airflow, saving 12 analyst-hours per cycle.
- Trained 2 non-technical colleagues to self-serve, cutting ad-hoc request volume by 40%.
- Defined and documented 15 core business metrics in the semantic layer, ending duplicate definitions.

### Data Analyst, Cloudflare

Aug 2014 – Sep 2020 | South David

- Consolidated 30 legacy reports into 3 maintained dashboards.
- Modelled pricing scenarios in Airflow, supporting a 55% margin improvement.

### Data Engineer

Summit Digital | Jul 2013 – Jul 2014 | Michaelton

- Built data quality tests in dbt that catch upstream breakages before stakeholders see them.

### Business Intelligence Analyst, NVIDIA

Aug 2011 – Feb 2013 | Jasonbury (Remote (UK))

- Ran cohort analysis that reframed how the business measures activation.

## ACADEMIC HISTORY

### Bachelor, Business Administration

Sandalwood University | 2011

Magna Cum Laude

## CORE COMPETENCIES

BigQuery (8 years), Airflow (13 years), Redshift (4 years), Spark (6 years), SQL (5 years), NumPy (5 years), Power BI (7 years), Pandas (10 years), dbt (1 year), Bash (2 years), Scala (9 years), Postman (1 year)

## NOTABLE PROJECTS

### Home energy dashboard

Collects meter readings and renders them with Pandas. Mostly an excuse to learn time-series storage properly.

### Recipe search engine

Full-text search over a scraped recipe corpus using Scala; learned more about ranking than about cooking.

## LANGUAGE SKILLS

English – C2

French – B2
