

# Lauren Guerra

## Career Objective

QA/Testing graduate looking for a first role. Picked up Docker and pytest through coursework and side projects rather than commercial work, and I'd like to learn the rest somewhere that reviews code properly.

## Education

### Bachelor, Economics

Lakeshore University | 2021–2025

Relevant coursework: Econometrics, Public Economics, Microeconomic Theory, Game Theory

## Relevant Experience

Seeking a first professional role; see projects below.

## Selected Projects

### Charity chatbot

Built a Databricks assistant for a local charity to answer volunteer questions; retired it once they moved to a supported platform.

### Home energy dashboard

Collects meter readings and renders them with Databricks. Mostly an excuse to learn time-series storage properly.

### Personal finance tracker

Self-hosted spend tracker built with Python. Deliberately kept the data local rather than using a hosted service.
