Profile

Applied Scientist with 1 year of commercial experience across Data/AI/ML. I learn fast, ask a lot of questions, and care about leaving code clearer than I found it. Core tools: Docker, SQL.

Academic Background

Master, Software Engineering

Cedar Hollow University | 2022–2024

Thesis: “Contract testing between independently deployed services”

Bachelor, Software Engineering

University of California, Berkeley | 2017–2021

Tech Stack

Docker	
SQL	
NumPy	
GitHub Actions	
Linux	

Career History

Applied Scientist, Cobalt Systems

2025–Present | Nancytown (Hybrid - 2 days on-site)

- Wrote the team's model documentation and review standard, now required before any production launch.
- Productionised demand forecasting models that reduced stock-outs by 55% across 10 regions.
- Cut inference cost by 30% through quantisation, batching and autoscaling on Linux.
- Mentored 6 analysts moving into modelling work, with weekly paper reading and code review.

Personal Projects

Commute optimiser

Pulls transit APIs and suggests departure times, built on Docker.

SQL utility library

Open-source helper library for SQL, ~600 GitHub stars. Wrote the docs and handled issue triage.

Home energy dashboard

Collects meter readings and renders them with GitHub Actions. Mostly an excuse to learn time-series storage properly.

Honours & Awards

Employee of the Quarter, 2022

Internal Hackathon Winner, 2025
