CAREER HISTORY

2019-09 — 2026-07	Senior Backend Developer Shopify – Led the migration of a legacy monolith to JavaScript, taking deployments from fortnightly to 8 per day. – Designed and shipped Next.js services handling 4k requests per minute, cutting p99 latency from 320ms to 180ms. – Drove the team's adoption of trunk-based development, reducing merge conflicts and lead time by 20%.
2013-01 — 2019-08	Software Engineer Nova Tech Group – Hardened authentication flows in JavaScript after a security review, closing 4 findings before audit. – Built a reusable Vue.js component library adopted by 30 product teams, removing months of duplicated work.
2011-04 — 2012-10	Junior Mobile Engineer Meridian Software – Partnered with product to scope and deliver 3 major releases, each behind staged rollouts.
2010-04 — 2011-03	Full-Stack Developer Foxglove Media – Mentored 30 junior engineers, ran weekly design reviews, and authored the team's onboarding guide.
