RELEVANT EXPERIENCE

Senior Machine Learning Engineer

Stonebridge IT | 04/2021 - 06/2026

- Wrote the team's model documentation and review standard, now required before any production launch.
- Ran A/B tests across 30 model variants; the winning variant added an estimated \$300k in annual revenue.
- Migrated ad-hoc notebooks into versioned NumPy pipelines with reproducible runs and tracked experiments.
- Cut inference cost by 40% through quantisation, batching and autoscaling on GitHub Actions.
- Developed an NLP classification system in Pandas reaching 92% F1, replacing a manual review queue.

Junior Data Scientist, Summit Digital

11/2009 - 11/2020

- Reduced label noise by redesigning the annotation guidelines, improving validation accuracy by 45%.
- Mentored 30 analysts moving into modelling work, with weekly paper reading and code review.
- Built an end-to-end training pipeline on Pandas, cutting retraining from days to 15 hours.
- Established offline/online evaluation parity, catching 15 silent regressions before release.
