ABOUT ME

AI Researcher with 8 years in Data/AI/ML, currently at Lumen Works. I work at the point where architecture meets delivery: setting technical direction, then staying close enough to the code to know whether it held. Strongest in Docker, Snowflake and TensorFlow.

WORK EXPERIENCE

06/2022 - 04/2026	AI Researcher Lumen Works » Wrote the team's model documentation and review standard, now required before any production launch. » Developed an NLP classification system in PyTorch reaching 85% F1, replacing a manual review queue. » Established offline/online evaluation parity, catching 40 silent regressions before release. » Cut inference cost by 30% through quantisation, batching and autoscaling on Docker. » Built the feature store that 50 downstream models now read from, ending duplicated feature logic.
05/2017 - 01/2022	Junior MLOps Engineer Vantage Analytics » Trained and deployed PyTorch models serving 50M predictions per day at under 40ms p95. » Reduced label noise by redesigning the annotation guidelines, improving validation accuracy by 55%. » Productionised demand forecasting models that reduced stock-outs by 40% across 15 regions. » Built an end-to-end training pipeline on PyTorch, cutting retraining from days to 4 hours.

ACADEMIC BACKGROUND

High School

Lake Curtis High School | 2014 - 2017

SKILLS

Docker

Snowflake

TensorFlow

Hugging Face

LangChain

PyTorch

Scikit-learn

Sketch

Swift

Pandas

HONOURS & AWARDS

Peer Recognition Award, 2016

Employee of the Quarter, 2016

VOLUNTEER EXPERIENCE

Maintainer of a small open-source Snowflake library used by a handful of teams.
