

Daniel Coleman

Professional Profile

Pragmatic Test Automation Engineer (5 years in QA/Testing). I enjoy untangling messy systems and leaving them simpler than I found them. Day to day that means Selenium, Postman and a lot of conversations with the people who use what we build.

Experience

Nov '23 – Jul '26	Test Automation Engineer SAP - Integrated automated checks into the the in-house toolchain pipeline, blocking 40 faulty releases. - Built a performance harness in pytest simulating 30k concurrent users. - Wrote the team's testing strategy, separating unit, contract and end-to-end responsibilities. - Established test data management practices later adopted by 15 teams.
Nov '20 – Jul '23	Junior QA Engineer Datadog - Introduced flaky-test quarantine, taking suite reliability from 6% to 85%. - Reduced escaped defects by 15% through risk-based test prioritisation. - Partnered with developers to shift testing left, embedding QA in refinement sessions.

Academic History

PhD, Computer Science

Vernon Hills University | 2014 – 2019

Bachelor, Computer Science

Ashford Technical University | 2010 – 2014

Technologies

Selenium	
Postman	
pytest	
Git	
JavaScript	
MySQL	
Scala	
Playwright	

Training & Certifications

Professional Data Engineer — Google Cloud, 2016

Selected Publications

"Scheduling strategies for distributed task queues" - co-authored conference paper, 2020.

Community

STEM ambassador running school workshops twice a term.

Outside of Work

Long-distance swimming, Urban sketching
