Professional Summary

Pragmatic Software Engineer (7 years in Software Development). I enjoy untangling messy systems and leaving them simpler than I found them. Day to day that means PostgreSQL, REST APIs and a lot of conversations with the people who use what we build.

Employment History

Aug '23 – Jan '26	Software Engineer Cobalt Systems - Replaced a third-party dependency with an in-house React module, saving \$5k per year in licence fees. - Led the migration of a legacy monolith to Python, taking deployments from fortnightly to 8 per day. - Designed and shipped Django services handling 3k requests per minute, cutting p99 latency from 780ms to 110ms. - Owned the customer-facing API end to end on Python, from schema design through on-call support.
Mar '20 – Apr '23	Full-Stack Developer Vantage Analytics - Rewrote the search path in Angular, dropping median response from 450ms to 40ms for 12M monthly users. - Introduced contract testing with Python, lifting coverage from 30% to 82% and cutting integration bugs. - Partnered with product to scope and deliver 3 major releases, each behind staged rollouts.
May '18 – Dec '19	Software Engineer Shopify - Cut CI build times by 55% by parallelising the AWS pipeline and caching dependency layers. - Hardened authentication flows in REST APIs after a security review, closing 10 findings before audit.

Academic History

High School

Williamsstad High School | 2018

Technical Proficiencies

- PostgreSQL
- REST APIs
- React
- Python
- Django
- Angular
- Jira
- AWS
- Nginx

Certificates

HashiCorp Certified: Terraform Associate — HashiCorp, 2026

Language Skills

English – Native
