Personal Statement

Senior Business Intelligence Analyst with 17 years in Data Analysis, currently at Redwood Data. I work at the point where architecture meets delivery: setting technical direction, then staying close enough to the code to know whether it held. Strongest in Redshift, Power BI and BigQuery.

Experience

Senior Business Intelligence Analyst

Redwood Data | 2019–Present

- Modelled pricing scenarios in MySQL, supporting a 18% margin improvement.
- Consolidated 3 legacy reports into 8 maintained dashboards.
- Ran cohort analysis that reframed how the business measures activation.
- Rebuilt the finance forecast with the FP&A; team, improving accuracy by 40%.
- Built Power BI dashboards used daily by 8 stakeholders across three departments.

Analytics Engineer, Amazon

2014–2019

- Analysed churn drivers and informed retention work that reduced churn by 35%.
- Partnered with engineering to fix event tracking, recovering 35% of previously lost sessions.
- Trained 15 non-technical colleagues to self-serve, cutting ad-hoc request volume by 45%.
- Automated monthly reporting with Excel, saving 12 analyst-hours per cycle.

Junior Data Analyst, Stripe

2010–2014

- Built data quality tests in Snowflake that catch upstream breakages before stakeholders see them.
- Designed the experiment readouts template now used company-wide.
- Defined and documented 15 core business metrics in the semantic layer, ending duplicate definitions.

Data Analyst, Summit Digital

2008–2010

- Presented findings to the executive team monthly, translating analysis into concrete decisions.
- Migrated reporting from spreadsheets to MySQL, giving one trusted source of numbers.
- Led a team of 6 through a full replatforming with no missed delivery dates.
