Professional Summary

Early-career Junior Site Reliability Engineer with 1 year in DevOps/Infrastructure. Strongest in Ansible; currently deepening my AWS experience through production work rather than tutorials.

Education and Training

Bachelor, Data Science

Fairview Institute of Technology | 2022 — 2025

First Class Honours

Professional Experience

Beacon Interactive — Junior Site Reliability Engineer

2025-04 — Present | Lake Samanthabury

- Automated 6 manual runbooks, saving an estimated 40 engineer-hours per month.
- Reduced incident MTTR from 4 hours to under 90 minutes with better alert routing and runbooks.
- Ran the on-call rotation for 30 production services, sustaining 99.9% availability.
- Introduced infrastructure-as-code with Grafana, eliminating manual provisioning entirely.

Technologies

Ansible (1 year), AWS (1 year), Grafana (1 year), C++ (1 year), Go (1 year)

Open Source

Match-day predictor

Small model in C++ predicting league results. Beats the naive baseline; still loses to the bookmakers.

Home energy dashboard

Collects meter readings and renders them with Ansible. Mostly an excuse to learn time-series storage properly.

Personal finance tracker

Self-hosted spend tracker built with Grafana. Deliberately kept the data local rather than using a hosted service.

Achievements

Best Team Contribution, 2021

Volunteer Experience

Maintainer of a small open-source C++ library used by a handful of teams.
