Professional Summary

QA Analyst with 10 years in QA/Testing, currently at NVIDIA. I work at the point where architecture meets delivery: setting technical direction, then staying close enough to the code to know whether it held. Strongest in Java, GitHub Actions and pytest.

Experience

QA Analyst

NVIDIA | September 2019 to Current

- Built the defect triage process and reporting the engineering leads still use.
- Mentored 15 manual testers into automation roles.
- Set up cross-browser and device coverage in Selenium, catching defects staging had missed.
- Owned release sign-off for 2 services, coordinating across product and support.

SDET, Nova Tech Group

March 2017 to April 2019

- Drove accessibility coverage from 6% to 88% of core journeys.
- Cut end-to-end suite runtime from 8 hours to 8 minutes through parallelisation.
- Introduced flaky-test quarantine, taking suite reliability from 40% to 96%.

Meridian Software — QA Engineer

April 2016 to March 2017

- Integrated automated checks into the GitHub Actions pipeline, blocking 8 faulty releases.
- Wrote the team's testing strategy, separating unit, contract and end-to-end responsibilities.

Academic Background

Bachelor, Biology

Politecnico di Milano | 2010 to 2014

Key Skills

Java (9 years), GitHub Actions (7 years), pytest (1 year), TypeScript (4 years), JavaScript (3 years), Selenium (1 year), Git (5 years), Tableau (8 years), Power BI (8 years), Postman (4 years)

Notable Projects

Personal finance tracker

Self-hosted spend tracker built with JavaScript. Deliberately kept the data local rather than using a hosted service.

Certifications

Azure Solutions Architect Expert (AZ-305) — Microsoft, 2018

Tableau Desktop Specialist — Tableau, 2017

Volunteer Experience

STEM ambassador running school workshops twice a term.

Language Skills

English – C2

Japanese – Intermediate (B1)
