Personal Statement

Early-career Analytics Engineer with 2 years in Data Analysis. Strongest in Pandas; currently deepening my Excel experience through production work rather than tutorials.

Academic Background

High School

Lake Christopher High School | 2020 — 2023

Career History

Summit Digital — Analytics Engineer

2023-12 — 2026-01

- Presented findings to the executive team monthly, translating analysis into concrete decisions.
- Modelled pricing scenarios in Snowflake, supporting a 70% margin improvement.
- Migrated reporting from spreadsheets to BigQuery, giving one trusted source of numbers.
- Built data quality tests in Pandas that catch upstream breakages before stakeholders see them.

Technical Proficiencies

- Pandas
- Excel
- NumPy
- BigQuery
- Snowflake
- Linux
- dbt
- Kotlin

Personal Projects

Home energy dashboard

Collects meter readings and renders them with dbt. Mostly an excuse to learn time-series storage properly.

Match-day predictor

Small model in NumPy predicting league results. Beats the naive baseline; still loses to the bookmakers.

Recipe search engine

Full-text search over a scraped recipe corpus using Linux; learned more about ranking than about cooking.
