Summary

Pragmatic Backend Developer (6 years in Software Development). I enjoy untangling messy systems and leaving them simpler than I found them. Day to day that means TypeScript, Python and a lot of conversations with the people who use what we build.

Education

Bachelor, Biology

Riverside State University | 2017–2020

Relevant Experience

Meridian Software — Backend Developer

2022–Present | New Raymondfort

- Partnered with product to scope and deliver 6 major releases, each behind staged rollouts.
- Designed and shipped Python services handling 20k requests per minute, cutting p99 latency from 900ms to 110ms.
- Rewrote the search path in Python, dropping median response from 780ms to 110ms for 20M monthly users.
- Hardened authentication flows in Go after a security review, closing 15 findings before audit.

Summit Digital — Full-Stack Developer

2021–2021 | East Justintown (Remote (UK))

- Set the service-level objectives for 30 services and built the dashboards the team still runs on.
- Owned the customer-facing API end to end on TypeScript, from schema design through on-call support.
- Drove the team's adoption of trunk-based development, reducing merge conflicts and lead time by 12%.

Platform Engineer, Foxglove Media

2020–2021 | Lake Kelsey

- Mentored 3 junior engineers, ran weekly design reviews, and authored the team's onboarding guide.
- Introduced contract testing with Python, lifting coverage from 8% to 92% and cutting integration bugs.

Tech Stack

TypeScript, Python, Go, Docker, Figma, Redis, Ruby

Projects

Technical blog

Writing up Docker experiments and failures, roughly 1k readers a month.

Certifications

AWS Certified Solutions Architect - Associate — Amazon Web Services, 2019

AWS Certified Developer - Associate — Amazon Web Services, 2017

Certified ScrumMaster (CSM) — Scrum Alliance, 2022

Selected Publications

"Sequence alignment heuristics for large genomes" - technical report, 2020. Cited internally as the basis for the current design.

"Sequence alignment heuristics for large genomes" - co-authored conference paper, 2021.
