Personal Statement

Software Engineer with 4 years in Software Development, focused on Python and Angular. Comfortable owning a feature from discovery through to production support.

Education & Qualifications

High School

South John High School | 2017 - 2020

Relevant Experience

Summit Digital — Software Engineer

11/2021 - Present | Amyfurt

- Refactored the billing module behind a feature flag, eliminating 70% of recurring production incidents.
- Designed and shipped Java services handling 8k requests per minute, cutting p99 latency from 900ms to 60ms.
- Cut CI build times by 35% by parallelising the Jenkins pipeline and caching dependency layers.
- Hardened authentication flows in REST APIs after a security review, closing 3 findings before audit.

Key Skills

Languages: Python, JavaScript, Java, Go

Frameworks: Angular

Cloud & DevOps: GCP, Jenkins

Data: Snowflake

Testing & Tooling: REST APIs

Selected Projects

REST APIs utility library

Open-source helper library for REST APIs, ~900 GitHub stars. Wrote the docs and handled issue triage.

Commute optimiser

Pulls transit APIs and suggests departure times, built on Python.

Licences & Certifications

Databricks Certified Data Engineer Associate — Databricks, 2024

Selected Publications

"Scheduling strategies for distributed task queues" - co-authored conference paper, 2021.

Honours & Awards

Peer Recognition Award, 2025

Best Team Contribution, 2024
