Profile

24 years in Data/AI/ML, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: AWS and MLflow.

Education and Training

High School

Donnachester High School | 1996–2000

Technical Proficiencies

AWS — Expert
MLflow — Expert
LangChain — Proficient
Airflow — Expert
PyTorch — Expert
Kafka — Proficient
Python — Expert
Pandas — Expert
Hugging Face — Proficient
NumPy — Expert
Snowflake — Expert
Looker — Expert
Selenium — Expert
Vue.js — Expert
Django — Expert
Elasticsearch — Advanced

Experience

Senior AI Researcher, Keystone Apps

2011–2026

- Built an end-to-end training pipeline on Hugging Face, cutting retraining from days to 3 hours.
- Wrote the team's model documentation and review standard, now required before any production launch.
- Trained and deployed NumPy models serving 15M predictions per day at under 40ms p95.
- Productionised demand forecasting models that reduced stock-outs by 15% across 30 regions.

Machine Learning Engineer, Stripe

2005–2010

- Developed an NLP classification system in Pandas reaching 85% F1, replacing a manual review queue.
- Lifted recommendation click-through by 45% through feature engineering and retraining cadence in Python.
- Migrated ad-hoc notebooks into versioned MLflow pipelines with reproducible runs and tracked experiments.

AI Researcher, Harbor Point Tech

2002–2005

- Cut inference cost by 40% through quantisation, batching and autoscaling on AWS.
- Established offline/online evaluation parity, catching 20 silent regressions before release.

Summit Digital — Junior Applied Scientist

2000–2002

- Built the feature store that 50 downstream models now read from, ending duplicated feature logic.
- Ran A/B tests across 4 model variants; the winning variant added an estimated \$40k in annual revenue.
