About Me

Recent graduate moving into Software Development. Most of my practical experience is self-directed - personal projects in FastAPI and REST APIs - and I'm looking for a team to learn production engineering with.

Education

Bachelor, Electrical Engineering

University of California, Berkeley | 2021 to 2025

Work Experience

Seeking a first professional role; see projects below.

Core Competencies

- FastAPI
- REST APIs
- Terraform
- Next.js

Projects

Match-day predictor

Small model in REST APIs predicting league results. Beats the naive baseline; still loses to the bookmakers.

Charity chatbot

Built a REST APIs assistant for a local charity to answer volunteer questions; retired it once they moved to a supported platform.

Home energy dashboard

Collects meter readings and renders them with Terraform. Mostly an excuse to learn time-series storage properly.
