

Tracie Wyatt

Site Reliability Engineer

Personal Statement

8 years in DevOps/Infrastructure, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: Docker and Grafana.

Education & Qualifications

Bachelor, Business Administration

University of Edinburgh | 2013 – 2016

Experience

Site Reliability Engineer

Nova Tech Group | Aug '21 – Aug '26 | Colemanmouth

- Wrote the platform team's paved-road documentation, cutting onboarding from weeks to days.
- Built CI/CD pipelines with Docker, bringing mean time to deploy under 15 minutes.
- Introduced secret rotation and least-privilege IAM across 10 accounts.
- Built observability on Ansible so teams could self-serve dashboards instead of filing tickets.

Clearwater Systems — DevOps Engineer

Nov '19 – Apr '21 | Leslieborough

- Led the Kubernetes upgrade across 50 clusters with zero customer-visible downtime.
- Introduced infrastructure-as-code with Ansible, eliminating manual provisioning entirely.
- Reduced incident MTTR from 12 hours to under 45 minutes with better alert routing and runbooks.

Cloud Engineer

Cobalt Systems | Dec '17 – Nov '19 | East Richardfurt

- Improved cluster utilisation by 15% through right-sizing and AWS autoscaling policies.
- Ran the on-call rotation for 4 production services, sustaining 99.9% availability.

Professional Certifications

Databricks Certified Data Engineer Associate — Databricks, 2020

Volunteer Experience

Maintainer of a small open-source GCP library used by a handful of teams.
