SUMMARY

Senior QA/Testing professional, 22 years in. Track record of taking ambiguous problems through design, delivery and the unglamorous operational work that follows. I mentor deliberately and write things down. Core stack: pytest, Git, Docker.

WORK EXPERIENCE

02/2012 - Present	Senior SDET Salesforce - Automated 10 regression suites with Postman, cutting the manual test cycle by 45%. - Built a performance harness in pytest simulating 6k concurrent users. - Owned release sign-off for 4 services, coordinating across product and support. - Drove accessibility coverage from 30% to 96% of core journeys. - Established test data management practices later adopted by 20 teams.
11/2006 - 12/2011	Quality Engineer Lumen Works - Mentored 40 manual testers into automation roles. - Introduced flaky-test quarantine, taking suite reliability from 30% to 82%. - Built the defect triage process and reporting the engineering leads still use. - Wrote the team's testing strategy, separating unit, contract and end-to-end responsibilities.
04/2005 - 11/2006	Test Automation Engineer Netflix - Partnered with developers to shift testing left, embedding QA in refinement sessions. - Integrated automated checks into the GitHub Actions pipeline, blocking 3 faulty releases. - Set up cross-browser and device coverage in Playwright, catching defects staging had missed.
01/2004 - 11/2004	QA Analyst Redwood Data - Cut end-to-end suite runtime from 40 hours to 12 minutes through parallelisation. - Reduced escaped defects by 12% through risk-based test prioritisation. - Presented the team's work at an internal engineering forum of 80+ colleagues.
07/2003 - 01/2004	Junior Quality Engineer Beacon Interactive - Ran retrospectives and drove the follow-up actions to completion, not just to the board. - Took over an unowned service, documented it and brought it back under SLO. - Standardised the team's tooling with GitHub Actions, ending long-running environment drift.
