CAREER HIGHLIGHTS

- Negotiated scope with engineering and legal to ship a compliance deadline on time.
- Built the experimentation framework the team uses to size bets before committing.
- Partnered with data to define activation and retention definitions the whole company now uses.

EXPERIENCE

Senior Product Manager

Lumen Works | Mar 2008 – Current | South James

- Prototyped 8 concepts in Sketch and killed two early on evidence rather than opinion.
- Wrote the PRDs and acceptance criteria for a platform migration affecting 10k users.
- Introduced accessibility standards to the design process, taking 8 flows to WCAG AA.
- Facilitated usability testing that surfaced 10 critical friction points before launch.
- Defined north-star metrics and instrumented them across 8 delivery squads.

Stripe — UX Researcher

Oct 2001 – Mar 2008 | South Dennis

- Ran quarterly roadmap reviews with executive stakeholders and published the trade-offs openly.
- Redesigning onboarding in TypeScript, lifting activation from 30% to 82%.
- Prioritised a backlog for 4 engineers, delivering 4 releases per quarter.
- Ran discovery interviews with 3 customers, reshaping the following year's roadmap.

Nova Tech Group — Product Designer

Jun 2000 – Jul 2001 | North Kennethberg (Hybrid)

- Shipped a design system in Figma adopted across 12 product surfaces.
- Reduced support contacts by 25% by reworking the checkout and error states.
- Managed stakeholder communication during a major incident, including the post-mortem.

Product Manager, Palantir

Jun 1998 – Jan 2000 | Javierchester

- Led a team of 6 through a full replatforming with no missed delivery dates.
- Introduced written design docs and an RFC process, cutting rework late in delivery.
- Standardised the team's tooling with Datadog, ending long-running environment drift.

EDUCATION AND TRAINING

Bachelor, Business Administration

University of California, Berkeley | 1995 – 1998

TECHNICAL SKILLS

- Looker
- Sketch
- Excel
- TypeScript
- SQL
- Git
- Figma
- Confluence

- Jira
- React
- Tableau
- Redshift
- Selenium
- Java
- Datadog
- NumPy

NOTABLE PROJECTS

Personal finance tracker

Self-hosted spend tracker built with Git. Deliberately kept the data local rather than using a hosted service.

Home energy dashboard

Collects meter readings and renders them with Excel. Mostly an excuse to learn time-series storage properly.

RECOGNITION

Best Team Contribution, 2017
