## About Me

Quality Engineer with 15 years in QA/Testing, currently at Lumen Works. I work at the point where architecture meets delivery: setting technical direction, then staying close enough to the code to know whether it held. Strongest in Selenium, Jira and Cypress.

## Selected Highlights

- Integrated automated checks into the Docker pipeline, blocking 3 faulty releases.
- Built a performance harness in Java simulating 6k concurrent users.
- Established test data management practices later adopted by 3 teams.

## Work Experience

### Quality Engineer, Lumen Works

06/2016 - 01/2026

- Drove accessibility coverage from 4% to 94% of core journeys.
- Owned release sign-off for 15 services, coordinating across product and support.
- Automated 20 regression suites with Postman, cutting the manual test cycle by 25%.
- Reduced escaped defects by 20% through risk-based test prioritisation.

### Junior Quality Engineer

Keystone Apps | 04/2012 - 04/2016

- Built the defect triage process and reporting the engineering leads still use.
- Set up cross-browser and device coverage in Cypress, catching defects staging had missed.
- Cut end-to-end suite runtime from 6 hours to 6 minutes through parallelisation.

### Junior Quality Engineer, NVIDIA

05/2011 - 04/2012

- Mentored 4 manual testers into automation roles.
- Wrote the team's testing strategy, separating unit, contract and end-to-end responsibilities.

### Junior Test Automation Engineer

Harbor Point Tech | 07/2010 - 01/2011

- Partnered with developers to shift testing left, embedding QA in refinement sessions.
- Introduced flaky-test quarantine, taking suite reliability from 6% to 85%.

## Education

### Bachelor, Physics

Northgate University | 2010

## Tech Stack

Selenium — Intermediate

Jira — Working knowledge

Cypress — Intermediate

GitHub Actions — Working knowledge

Java — Advanced

Git — Intermediate

Postman — Proficient

Docker — Intermediate

Jenkins — Expert

Next.js — Intermediate
