Summary

Senior Data/AI/ML professional, 10 years in. Track record of taking ambiguous problems through design, delivery and the unglamorous operational work that follows. I mentor deliberately and write things down. Core stack: Airflow, Snowflake, BigQuery.

Career Highlights

- Cut inference cost by 35% through quantisation, batching and autoscaling on Azure.
- Built the feature store that 12 downstream models now read from, ending duplicated feature logic.
- Built an end-to-end training pipeline on LangChain, cutting retraining from days to 2 hours.

Experience

MLOps Engineer, Cloudflare

02/2016 - Present

- Wrote the team's model documentation and review standard, now required before any production launch.
- Reduced label noise by redesigning the annotation guidelines, improving validation accuracy by 25%.
- Translated ambiguous business questions into a modelling roadmap with product and finance stakeholders.
- Trained and deployed Python models serving 40M predictions per day at under 60ms p95.

Qualifications

Bachelor, Data Science

Granite Bay University | 2012 - 2016

Technical Skills

Languages: Python

Frameworks: NumPy, LangChain, Node.js

Cloud & DevOps: AWS, Azure

Data: Airflow, Snowflake, BigQuery, Redis

Side Projects

Charity chatbot

Built a Airflow assistant for a local charity to answer volunteer questions; retired it once they moved to a supported platform.

Technical blog

Writing up BigQuery experiments and failures, roughly 5k readers a month.

Licences & Certifications

Azure Fundamentals (AZ-900) — Microsoft, 2020

Languages

English – Bilingual
