Profile

Pragmatic Insights Analyst (4 years in Data Analysis). I enjoy untangling messy systems and leaving them simpler than I found them. Day to day that means Tableau, SQL and a lot of conversations with the people who use what we build.

Professional Experience

January 2024 to Now	Insights Analyst Vantage Analytics - Rebuilt the finance forecast with the FP&A; team, improving accuracy by 55%. - Built Tableau dashboards used daily by 4 stakeholders across three departments. - Built data quality tests in SQL that catch upstream breakages before stakeholders see them.
July 2022 to November 2023	Junior Analytics Engineer Lumen Works - Partnered with engineering to fix event tracking, recovering 40% of previously lost sessions. - Defined and documented 20 core business metrics in the semantic layer, ending duplicate definitions.

Education

High School

West Nathan High School | 2017 to 2021

Skills

Languages: SQL, Python

Cloud & DevOps: Linux, GitHub Actions

Data: Redshift, Snowflake

Analytics & Design: Tableau

Notable Projects

Charity chatbot

Built a Redshift assistant for a local charity to answer volunteer questions; retired it once they moved to a supported platform.

Personal finance tracker

Self-hosted spend tracker built with Tableau. Deliberately kept the data local rather than using a hosted service.

Language Skills

English – Native

Turkish – Fluent
