Personal Statement

9 years in QA/Testing, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: TypeScript and Docker.

Employment History

Cloudflare — Test Automation Engineer

2021-03 — Present | Kerryport (Remote)

- Reduced escaped defects by 20% through risk-based test prioritisation.
- Cut end-to-end suite runtime from 4 hours to 4 minutes through parallelisation.
- Wrote the team's testing strategy, separating unit, contract and end-to-end responsibilities.

SDET, Keystone Apps

2017-05 — 2020-11 | West Jamie

- Built a performance harness in Selenium simulating 30k concurrent users.
- Established test data management practices later adopted by 8 teams.
