EMPLOYMENT HISTORY

Software Engineer

Redwood Data | 2022–Present | Haydenmouth (Remote (UK))

- Owned the customer-facing API end to end on Spring Boot, from schema design through on-call support.
- Rewrote the search path in React, dropping median response from 780ms to 40ms for 15M monthly users.
- Led the migration of a legacy monolith to Java, taking deployments from fortnightly to 12 per day.
- Set the service-level objectives for 12 services and built the dashboards the team still runs on.

Full-Stack Developer, BrightPath Solutions

2019–2021 | Scottbury (Remote)

- Hardened authentication flows in React after a security review, closing 6 findings before audit.
- Refactored the billing module behind a feature flag, eliminating 35% of recurring production incidents.
- Introduced contract testing with Python, lifting coverage from 10% to 85% and cutting integration bugs.

Junior Platform Engineer

SAP | 2017–2019 | Josephfort

- Drove the team's adoption of trunk-based development, reducing merge conflicts and lead time by 12%.
- Partnered with product to scope and deliver 2 major releases, each behind staged rollouts.
