CAREER OBJECTIVE

9 years in DevOps/Infrastructure, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: Linux and Nginx.

CAREER HIGHLIGHTS

- Reduced incident MTTR from 3 hours to under 30 minutes with better alert routing and runbooks.
- Introduced infrastructure-as-code with Ansible, eliminating manual provisioning entirely.
- Cut container image sizes by 12%, shortening cold starts across the fleet.

EMPLOYMENT HISTORY

Airbnb — DevOps Engineer

2020–Present

- Ran the on-call rotation for 30 production services, sustaining 99.9% availability.
- Hardened Prometheus environments ahead of SOC 2, closing 6 critical findings.
- Designed the multi-region failover strategy and led the game-day exercises that proved it.
- Introduced secret rotation and least-privilege IAM across 20 accounts.

Salesforce — Junior Platform Engineer

2018–2019

- Built CI/CD pipelines with Ansible, bringing mean time to deploy under 5 minutes.
- Led the Kubernetes upgrade across 50 clusters with zero customer-visible downtime.
- Built observability on Kubernetes so teams could self-serve dashboards instead of filing tickets.

Junior Platform Engineer

SAP | 2016–2018

- Migrated 10 services to Nginx, cutting monthly infrastructure spend by 45%.
- Improved cluster utilisation by 30% through right-sizing and GitHub Actions autoscaling policies.

EDUCATION AND TRAINING

Master, Physics

Vernon Hills University | 2016

Bachelor, Physics

Copperfield State University | 2010–2014

TECHNICAL SKILLS

Linux	
Nginx	
Prometheus	
GitHub Actions	
Ansible	
Python	
Go	
Kubernetes	
PyTorch	
Java	

Django

Next.js

SELECTED PROJECTS

Technical blog

Writing up Linux experiments and failures, roughly 4k readers a month.

Prometheus utility library

Open-source helper library for Prometheus, ~400 GitHub stars. Wrote the docs and handled issue triage.
