Pragmatic Software Engineer (5 years in Software Development). I enjoy untangling messy systems and leaving them simpler than I found them. Day to day that means FastAPI, Angular and a lot of conversations with the people who use what we build.

PROFESSIONAL EXPERIENCE

Clearwater Systems — Software Engineer

April 2024 to Current | West Diane

- Owned the customer-facing API end to end on React, from schema design through on-call support.
- Replaced a third-party dependency with an in-house FastAPI module, saving \$15k per year in licence fees.
- Rewrote the search path in FastAPI, dropping median response from 1200ms to 140ms for 20M monthly users.
- Set the service-level objectives for 5 services and built the dashboards the team still runs on.

Backend Developer, SAP

June 2020 to December 2023 | South Williamborough

- Hardened authentication flows in TypeScript after a security review, closing 40 findings before audit.
- Introduced contract testing with Cypress, lifting coverage from 40% to 96% and cutting integration bugs.
- Built a reusable Angular component library adopted by 50 product teams, removing months of duplicated work.
