ABOUT ME

Junior Site Reliability Engineer with 2 years of commercial experience across DevOps/Infrastructure. I learn fast, ask a lot of questions, and care about leaving code clearer than I found it. Core tools: Datadog, Kafka.

EDUCATION

Master, Electrical Engineering

University of Cambridge | 2022–2023

Thesis: “Signal denoising on embedded hardware”

Bachelor, Communications

Fairview Institute of Technology | 2018–2021

WORK EXPERIENCE

Junior Site Reliability Engineer

Summit Digital | 2023–Present

- Cut container image sizes by 30%, shortening cold starts across the fleet.
- Introduced infrastructure-as-code with Docker, eliminating manual provisioning entirely.
- Led the Kubernetes upgrade across 8 clusters with zero customer-visible downtime.

CORE COMPETENCIES

Datadog (1 year), Kafka (3 yrs), CI/CD (2 yrs), Bash (2 yrs), AWS (2 yrs), Docker (1 year), Angular (2 yrs), Python (3 yrs)

SELECTED PROJECTS

Recipe search engine

Full-text search over a scraped recipe corpus using Python; learned more about ranking than about cooking.

Home energy dashboard

Collects meter readings and renders them with AWS. Mostly an excuse to learn time-series storage properly.

Charity chatbot

Built a Python assistant for a local charity to answer volunteer questions; retired it once they moved to a supported platform.

PROFESSIONAL CERTIFICATIONS

HashiCorp Certified: Terraform Associate — HashiCorp, 2025

AWS Certified Developer - Associate — Amazon Web Services, 2025
