Personal Statement

MLOps Engineer with 17 years in Data/AI/ML, currently at Shopify. I work at the point where architecture meets delivery: setting technical direction, then staying close enough to the code to know whether it held. Strongest in Snowflake, Hugging Face and SQL.

Academic History

Work Experience

MLOps Engineer

Shopify | 2013-10 — Present | North Ambertown

- » Translated ambiguous business questions into a modelling roadmap with product and finance stakeholders.
- » Established offline/online evaluation parity, catching 10 silent regressions before release.
- » Cut inference cost by 22% through quantisation, batching and autoscaling on CI/CD.
- » Built the feature store that 5 downstream models now read from, ending duplicated feature logic.

Snowflake — Data Scientist

2009-04 — 2013-09 | West Lorborough (Remote (UK))

- » Ran A/B tests across 2 model variants; the winning variant added an estimated \$20k in annual revenue.
- » Developed an NLP classification system in NumPy reaching 92% F1, replacing a manual review queue.
- » Built an end-to-end training pipeline on Hugging Face, cutting retraining from days to 50 hours.
