Personal Statement

Software Engineer with 9 years in Software Development, currently at Lumen Works. I work at the point where architecture meets delivery: setting technical direction, then staying close enough to the code to know whether it held. Strongest in gRPC, Docker and pytest.

Education & Qualifications

Bachelor, Computer Science

Derrickberg University | 2015
Graduated with Distinction

Technical Skills

gRPC, Docker, pytest, Go, CI/CD, Angular, REST APIs, Vue.js, SQL, FastAPI, Elasticsearch, Kotlin

Relevant Experience

Software Engineer, Lumen Works

2019-02 — Present

- Cut CI build times by 55% by parallelising the CI/CD pipeline and caching dependency layers.
- Designed and shipped Angular services handling 2k requests per minute, cutting p99 latency from 600ms to 80ms.
- Hardened authentication flows in gRPC after a security review, closing 4 findings before audit.
- Owned the customer-facing API end to end on gRPC, from schema design through on-call support.

Software Engineer, Spotify

2017-12 — 2019-02

- Led the migration of a legacy monolith to Angular, taking deployments from fortnightly to 10 per day.
- Refactored the billing module behind a feature flag, eliminating 20% of recurring production incidents.
- Set the service-level objectives for 2 services and built the dashboards the team still runs on.

Vantage Point Technologies — Backend Developer

2016-12 — 2017-10

- Rewrote the search path in REST APIs, dropping median response from 780ms to 110ms for 30M monthly users.
- Partnered with product to scope and deliver 50 major releases, each behind staged rollouts.
