PROFILE

Platform Engineer with 13 years in Software Development, currently at Cobalt Applications. I work at the point where architecture meets delivery: setting technical direction, then staying close enough to the code to know whether it held. Strongest in Git, Angular and gRPC.

RELEVANT EXPERIENCE

Oct '16 – Present	Platform Engineer Cobalt Applications – Cut CI build times by 55% by parallelising the AWS pipeline and caching dependency layers. – Drove the team's adoption of trunk-based development, reducing merge conflicts and lead time by 40%. – Hardened authentication flows in gRPC after a security review, closing 2 findings before audit.
Apr '15 – Oct '16	Mobile Engineer Intel – Rewrote the search path in Java, dropping median response from 780ms to 80ms for 2M monthly users. – Partnered with product to scope and deliver 6 major releases, each behind staged rollouts.
Jul '12 – Dec '14	Mobile Engineer Dell – Owned the customer-facing API end to end on GraphQL, from schema design through on-call support.

ACADEMIC BACKGROUND

High School

Jamieborough High School | 2012

TECHNICAL SKILLS

- Git
- Angular
- gRPC
- Java
- GraphQL
- REST APIs
- Vue.js
- Spring Boot
- Django
- Kafka
- DynamoDB
- Swift
- AWS

SIDE PROJECTS

Match-day predictor

Small model in Angular predicting league results. Beats the naive baseline; still loses to the bookmakers.

Home energy dashboard

Collects meter readings and renders them with Spring Boot. Mostly an excuse to learn time-series storage properly.

CERTIFICATIONS

Databricks Certified Data Engineer Associate — Databricks, 2018

Certified Information Systems Security Professional (CISSP) — ISC2, 2018
