mary11@example.net 720.538.0695x86218 github.com/antoniodev

Career Objective

Junior Machine Learning Engineer with 1 year of commercial experience across Data/AI/ML. I learn fast, ask a lot of questions, and care about leaving code clearer than I found it. Core tools: NumPy, Databricks.

Relevant Experience

Amber Creek Software — Junior Machine Learning Engineer

05/2024 - 04/2026

- Built an end-to-end training pipeline on NumPy, cutting retraining from days to 20 hours.
- Trained and deployed Databricks models serving 12M predictions per day at under 110ms p95.

Academic History

PhD, Business Administration

Jacksonshire State University | 2021 - 2024

Bachelor, Business Administration

Port Kathleenport State University | 2017 - 2021

Tech Stack

NumPy, Databricks, AWS, TensorFlow, GCP, Cypress

Notable Projects

Match-day predictor

Small model in NumPy predicting league results. Beats the naive baseline; still loses to the bookmakers.

Personal finance tracker

Self-hosted spend tracker built with Cypress. Deliberately kept the data local rather than using a hosted service.

Recipe search engine

Full-text search over a scraped recipe corpus using TensorFlow; learned more about ranking than about cooking.

Volunteering

Volunteer instructor at a weekend coding club for 12 secondary school students.
