Professional Summary

10 years in Data/AI/ML, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: BigQuery and Databricks.

Professional Experience

October 2020 to Present	Applied Scientist Uber - Developed an NLP classification system in TensorFlow reaching 90% F1, replacing a manual review queue. - Established offline/online evaluation parity, catching 10 silent regressions before release. - Wrote the team's model documentation and review standard, now required before any production launch.
November 2018 to May 2020	AI Researcher Northbridge IT - Ran A/B tests across 20 model variants; the winning variant added an estimated \$200k in annual revenue. - Built the feature store that 20 downstream models now read from, ending duplicated feature logic.
May 2015 to October 2018	Data Scientist LinkedIn Mentored 20 analysts moving into modelling work, with weekly paper reading and code review.

Academic Background

Master, Mathematics

Bensonfort University | 2013 to 2014

Dean's List (2 years)

Thesis: "Convergence bounds for stochastic optimisation methods"

Bachelor, Mathematics

East Patrickville Institute of Technology | 2009 to 2012

Technologies

Languages: Python, SQL

Frameworks: TensorFlow, Node.js

Cloud & DevOps: GitHub Actions, Prometheus

Data: BigQuery, Databricks, MLflow, Airflow, Redshift

Languages

English – Native

Polish – C1
