

Ashley Lee

qgoodman@example.net – 896.952.7295 – linkedin.com/in/ashley-lee

PERSONAL STATEMENT

17 years in Data/AI/ML, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: AWS and TensorFlow.

ACADEMIC BACKGROUND

Bachelor, Electrical Engineering

Brandanton University | 2003 – 2007

EXPERIENCE

Senior Applied Scientist, Nova Tech Group

Mar 2017 – Jan 2026 | Smithberg

- Established offline/online evaluation parity, catching 5 silent regressions before release.
- Reduced label noise by redesigning the annotation guidelines, improving validation accuracy by 70%.
- Migrated ad-hoc notebooks into versioned Pandas pipelines with reproducible runs and tracked experiments.
- Ran A/B tests across 15 model variants; the winning variant added an estimated \$150k in annual revenue.

BrightPath Solutions — MLOps Engineer

Jan 2014 – Nov 2016 | East Kimberly (On-site)

- Built the feature store that 15 downstream models now read from, ending duplicated feature logic.
- Developed an NLP classification system in Databricks reaching 94% F1, replacing a manual review queue.
- Productionised demand forecasting models that reduced stock-outs by 40% across 5 regions.

Machine Learning Engineer, Adobe

Sep 2010 – Aug 2013 | East Tinafort (Hybrid - 2 days on-site)

- Mentored 2 analysts moving into modelling work, with weekly paper reading and code review.
- Built an end-to-end training pipeline on TensorFlow, cutting retraining from days to 6 hours.

Meridian Software — Applied Scientist

Aug 2008 – Jul 2010 | South Lisa

- Translated ambiguous business questions into a modelling roadmap with product and finance stakeholders.
- Trained and deployed Databricks models serving 12M predictions per day at under 40ms p95.

AI Researcher, Oracle

Jun 2007 – May 2008 | Smithland (Remote)

- Wrote the team's model documentation and review standard, now required before any production launch.
- Cut inference cost by 55% through quantisation, batching and autoscaling on GitHub Actions.

SIDE PROJECTS

Personal finance tracker

Self-hosted spend tracker built with Snowflake. Deliberately kept the data local rather than using a hosted service.

pytest utility library

Open-source helper library for pytest, ~800 GitHub stars. Wrote the docs and handled issue triage.

TRAINING & CERTIFICATIONS

Azure Fundamentals (AZ-900) — Microsoft, 2026

SELECTED PUBLICATIONS

"Signal denoising on embedded hardware" - technical report, 2008. Cited internally as the basis for the current design.

LANGUAGE SKILLS

English – Bilingual
