Profile

Senior MLOps Engineer with 14 years in Data/AI/ML, currently at Summit Digital. I work at the point where architecture meets delivery: setting technical direction, then staying close enough to the code to know whether it held. Strongest in Python, Scikit-learn and MLflow.

Work Experience

Senior MLOps Engineer

Summit Digital | January 2019 to Current

- Cut inference cost by 70% through quantisation, batching and autoscaling on the in-house toolchain.
- Lifted recommendation click-through by 35% through feature engineering and retraining cadence in Python.
- Trained and deployed NumPy models serving 50M predictions per day at under 80ms p95.
- Mentored 5 analysts moving into modelling work, with weekly paper reading and code review.

Junior Machine Learning Engineer

Nova Tech Group | January 2012 to January 2019

- Productionised demand forecasting models that reduced stock-outs by 25% across 30 regions.
- Reduced label noise by redesigning the annotation guidelines, improving validation accuracy by 55%.
- Ran A/B tests across 30 model variants; the winning variant added an estimated \$300k in annual revenue.

Education & Qualifications

Master, Information Systems

Samanthashire University | 2009 to 2011

Thesis: "Adoption barriers for self-service analytics"

Relevant coursework: Database Design, Business Process Modelling, IT Governance, Enterprise Architecture

Bachelor, Biology

Lake Dennisville State University | 2006 to 2009

Technical Proficiencies

Python, Scikit-learn, MLflow, BigQuery, PyTorch, TensorFlow, Pandas, Snowflake, Spark, NumPy, Kafka, PostgreSQL, Redis, Airflow, Next.js

Notable Projects

Personal finance tracker

Self-hosted spend tracker built with Next.js. Deliberately kept the data local rather than using a hosted service.

Language Skills

English – Bilingual

Interests

Amateur photography, Baking
