About Me

10 years in Data Analysis, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: Looker and Airflow.

Work Experience

Jul 2020 – Now	Business Intelligence Analyst Summit Digital - Rebuilt the finance forecast with the FP&A; team, improving accuracy by 40%. - Defined and documented 30 core business metrics in the semantic layer, ending duplicate definitions. - Built Tableau dashboards used daily by 4 stakeholders across three departments. - Migrated reporting from spreadsheets to Snowflake, giving one trusted source of numbers. - Trained 4 non-technical colleagues to self-serve, cutting ad-hoc request volume by 35%.
Dec 2018 – Jun 2020	Data Engineer Silverline Data - Ran cohort analysis that reframed how the business measures activation. - Designed the experiment readouts template now used company-wide. - Partnered with engineering to fix event tracking, recovering 55% of previously lost sessions. - Presented findings to the executive team monthly, translating analysis into concrete decisions.
Oct 2015 – Oct 2018	Junior Insights Analyst Nova Tech Group - Built data quality tests in Snowflake that catch upstream breakages before stakeholders see them. - Automated monthly reporting with Airflow, saving 2 analyst-hours per cycle. - Analysed churn drivers and informed retention work that reduced churn by 55%.

Qualifications
