## PROFESSIONAL PROFILE

Junior Machine Learning Engineer with 2 years of commercial experience across Data/AI/ML. I learn fast, ask a lot of questions, and care about leaving code clearer than I found it. Core tools: MLflow, SQL.

## EMPLOYMENT HISTORY

---

### Junior Machine Learning Engineer, SAP

2024-07 — Present | Taylorborough

- Cut inference cost by 40% through quantisation, batching and autoscaling on the in-house toolchain.
- Ran A/B tests across 50 model variants; the winning variant added an estimated \$500k in annual revenue.
- Built the feature store that 50 downstream models now read from, ending duplicated feature logic.
- Trained and deployed MLflow models serving 4M predictions per day at under 180ms p95.

## EDUCATION

---

### Bachelor, Communications

Williamsborough National University | 2022

## KEY SKILLS

---

- MLflow
- SQL
- Airflow
- PyTorch
- TensorFlow
- PostgreSQL
- Redshift
- DynamoDB

## NOTABLE PROJECTS

---

### Charity chatbot

Built a TensorFlow assistant for a local charity to answer volunteer questions; retired it once they moved to a supported platform.

### Personal finance tracker

Self-hosted spend tracker built with Airflow. Deliberately kept the data local rather than using a hosted service.

### Redshift utility library

Open-source helper library for Redshift, ~500 GitHub stars. Wrote the docs and handled issue triage.
