

James Johnson

Machine Learning Engineer

Summary

Pragmatic Machine Learning Engineer (4 years in Data/AI/ML). I enjoy untangling messy systems and leaving them simpler than I found them. Day to day that means NumPy, Docker and a lot of conversations with the people who use what we build.

Professional Experience

Machine Learning Engineer, Meridian Software

2024-10 — Present

- » Ran A/B tests across 6 model variants; the winning variant added an estimated \$60k in annual revenue.
- » Cut inference cost by 12% through quantisation, batching and autoscaling on Docker.
- » Mentored 40 analysts moving into modelling work, with weekly paper reading and code review.
- » Trained and deployed PyTorch models serving 5M predictions per day at under 80ms p95.

Spotify — MLOps Engineer

2021-11 — 2024-05

- » Migrated ad-hoc notebooks into versioned PyTorch pipelines with reproducible runs and tracked experiments.
- » Reduced label noise by redesigning the annotation guidelines, improving validation accuracy by 40%.
- » Lifted recommendation click-through by 25% through feature engineering and retraining cadence in LangChain.

Education & Qualifications

Master, Business Administration

Hernandezstad University | 2020 — 2021

Thesis: "Pricing strategy in two-sided marketplaces"

Bachelor, Business Administration

South Christopherfort State University | 2020

Open Source

LangChain utility library

Open-source helper library for LangChain, ~900 GitHub stars. Wrote the docs and handled issue triage.

Match-day predictor

Small model in LangChain predicting league results. Beats the naive baseline; still loses to the bookmakers.

Volunteer Experience

Committee member, local Data meetup - organise speakers and venue.
