## Profile

11 years in Data/AI/ML, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: Python and SQL.

## Academic Background

### Bachelor, Biology

Cardenasberg Institute of Technology | 2013

First Class Honours

## Employment History

### MLOps Engineer, Fenwick Digital

May '17 – Jan '26 | South Lisa (Hybrid - 2 days on-site)

- Established offline/online evaluation parity, catching 3 silent regressions before release.
- Built the feature store that 3 downstream models now read from, ending duplicated feature logic.
- Lifted recommendation click-through by 55% through feature engineering and retraining cadence in Spark.
- Ran A/B tests across 30 model variants; the winning variant added an estimated \$300k in annual revenue.

### Junior MLOps Engineer

IBM | May '15 – Dec '16 | South Angelaside

- Developed an NLP classification system in Python reaching 94% F1, replacing a manual review queue.
- Mentored 8 analysts moving into modelling work, with weekly paper reading and code review.
- Productionised demand forecasting models that reduced stock-outs by 60% across 30 regions.

### Data Scientist, Shopify

May '14 – Apr '15 | Brownshire

- Built an end-to-end training pipeline on PyTorch, cutting retraining from days to 5 hours.
