PERSONAL STATEMENT

Senior Software Development professional, 23 years in. Track record of taking ambiguous problems through design, delivery and the unglamorous operational work that follows. I mentor deliberately and write things down. Core stack: CI/CD, Python, Go.

EXPERIENCE

2015–2026	Lead Full-Stack Developer BrightPath Solutions – Hardened authentication flows in Go after a security review, closing 15 findings before audit. – Built a reusable Spring Boot component library adopted by 20 product teams, removing months of duplicated work. – Mentored 20 junior engineers, ran weekly design reviews, and authored the team's onboarding guide. – Set the service-level objectives for 12 services and built the dashboards the team still runs on. – Designed and shipped GraphQL services handling 12k requests per minute, cutting p99 latency from 320ms to 180ms.
2007–2015	Full-Stack Developer Vantage Point Technologies – Introduced contract testing with Python, lifting coverage from 40% to 82% and cutting integration bugs. – Drove the team's adoption of trunk-based development, reducing merge conflicts and lead time by 55%. – Owned the customer-facing API end to end on GraphQL, from schema design through on-call support. – Cut CI build times by 55% by parallelising the Docker pipeline and caching dependency layers.
2002–2007	Backend Developer Blue Orbit Labs – Replaced a third-party dependency with an in-house Go module, saving \$3k per year in licence fees. – Partnered with product to scope and deliver 2 major releases, each behind staged rollouts. – Refactored the billing module behind a feature flag, eliminating 55% of recurring production incidents.
